Cool Hand Electric, Heating, & AC Repair

Paid Advertising Report
Last 30 Days: September 9 to October 8, 2026
Channels: Google Search, YouTube, Facebook & Instagram
Prepared by TopServ Digital

This report covers the last 30 days of your paid advertising. Google Search is where your leads come from, so the lead counts and cost per lead below are Search only. The YouTube and Facebook/Instagram campaigns are there to keep the Cool Hand name in front of local homeowners, so they have their own section near the end and don't get mixed into the lead math. Google Local Services (the Google Guaranteed listing) also runs on your Google account, but it isn't managed by TopServ, so none of its numbers are included here.

Over these 30 days, Search brought in 66.5 leads at $57.03 each, and almost 9% of the people who clicked an ad went on to call, send a form or book online. Google sometimes splits the credit for one lead between two ads, which is why a few counts here end in .5.

1. Google Search at a Glance

Metric	Result
Total Spend	$3,792.54
Impressions	20,806
Clicks	748
Click-Through Rate	3.6%
Average Cost per Click	$5.07
Leads	66.5
Conversion Rate (clicks that became leads)	8.9%
Average Cost per Lead	**$57.03**

2. By Campaign

Campaign	Spend	Clicks	Leads	Cost/Lead	Conv. Rate
Electrical	$2,091.85	415	34	$61.52	8.2%
HVAC	$1,071.80	259	17	$63.05	6.6%
Branded	$628.90	74	15.5	$40.57	20.9%
Total	**$3,792.54**	**748**	**66.5**	**$57.03**	**8.9%**

3. Where the Leads Came From

Lead Type	Electrical	HVAC	Branded	Total
Phone calls from the ad (60 seconds or longer)	11	2	12.5	25.5
Website contact form	13	4	2	19
Online booking (Book Now)	4	4	0	8
Taps on your phone number on the website	6	7	1	14
Total	**34**	**17**	**15.5**	**66.5**

A call from the ad only counts once it lasts a full minute, so quick hang-ups and wrong numbers stay out. Phone number taps are people tapping your number on the website. That's a strong sign they meant to call, but not every tap ends up as a completed call, so it helps to compare these against the calls you're seeing on your end.

4. Weekly Trend (Google Search)

Week	Clicks	Spend	Leads	Cost/Lead
Sep 9 to 13*	134	$715.45	15.5	$46.16
Sep 14 to 20	202	$952.33	14	$68.02
Sep 21 to 27	162	$772.54	17	$45.44
Sep 28 to Oct 4	158	$797.11	16	$49.82
Oct 5 to 8*	92	$555.12	4	$138.78

*Partial weeks (5 days and 4 days). The full weeks held steady at 14 to 17 leads each. We rolled out a round of campaign updates on October 8 and 9 (see section 6), so the next report will be the first real look at how they're doing.

5. Branded vs. Non-Branded

- **Non-Branded (Electrical + HVAC):** $3,163.65 spent, 51 leads, $62.03 per lead. These are people searching for a service, like "electrician near me" or "ac repair," who don't know Cool Hand yet, so this is where new customers come from. Your ads showed on about 12% of the local searches they were eligible for (Electrical 14%, HVAC 11%). Most of the searches we didn't show on came down to ad position and Google's ad quality ratings more than budget, and that's exactly what the October updates go after.
- **Branded (your business name):** $628.90 spent, 15.5 leads, $40.57 per lead, and your ads showed on 79% of searches for your name. People searching for Cool Hand are already looking for you, and this campaign makes sure your ad is what they see first instead of a competitor's.

6. What We Updated (October 8 and 9)

- **Location targeting:** your ads now show only to people who are in, or regularly spend time in, your service area (Arlington, Burleson, Ennis, Fort Worth, Mansfield, Midlothian, Red Oak and Waxahachie).

- **Search refinements:** we added 34 searches your ads won't show for, like commercial and industrial jobs, home improvement and supply store searches, people looking for electrician jobs, solar and appliance repair. Searches for your own name now run through the Branded campaign, with four new keywords added there (cool hand hvac, heating, air and ac).
- **New ads:** 16 new ads, one for every Electrical and HVAC ad group, each written around the exact service and city people search for. Google approved all 16 on October 9 and they're the ads running now.
- **Links under your ads:** new sets of links for each campaign (7 for HVAC, 8 for Electrical, 6 for Branded) that take people straight to the matching page on your site, like AC Repair, Panel Upgrades and the $37 Safety Inspection.
- **Ad highlights:** refreshed the short lines that show with your ads (Family Owned and Local, Financing Available, Work Guaranteed), and the HVAC ads now mention easy payment plans. HVAC repair searches now land on your emergency HVAC page instead of the homepage.

7. Awareness Campaigns (Not Counted as Leads)

These campaigns aren't built to make the phone ring today. They keep Cool Hand familiar to homeowners in your area, so your name is the one they remember and search for when the AC quits or a breaker keeps tripping.

Metric	YouTube	Facebook & Instagram
Spend	$753.61	$599.10
Impressions	351,241	118,981
Cost per 1,000 Impressions	$2.15	$5.04
Video Views	1,385	1,081
People Reached	n/a	35,423
Times Each Person Saw Your Ads (average)	n/a	3.4

Meta also estimates about 1,200 people would remember seeing your ad if asked within two days, at about $0.50 each. A good place to see this work over time is the Branded campaign above, since more people who know your name means more people searching for it. Across all three channels, total ad spend for the 30 days was $5,145.25 ($3,792.54 Search, $753.61 YouTube and $599.10 Facebook & Instagram).

8. What's Next

- Give the new ads two to three weeks to settle in. That's about how long Google takes to update its quality ratings, and we'll review them in late October.
- Keep going through the real search terms every week and refining what your ads show for.
- Dedicated landing pages for your top services (electrician, AC repair and HVAC repair) are in the works, each one matched to the searches that bring people to it. We'll walk you through them before they go live.
- If you can share how many calls and booked jobs you saw from Google this month, we'll line them up against the numbers here so we're both looking at the same picture.
