Cool Hand Electric, Heating, & AC Repair

Paid Advertising Performance Update
August 21, 2026
Channels: Google Ads (live) and Meta Ads (launching)
Prepared by TopServ Digital

Google Ads has been live for eleven days and is generating consistent activity across all three campaigns. Meta is entering its launch phase, with the brand awareness campaign and the "Beat the Heat" tune-up and replacement offer both on track to go live Monday, August 24.

1. What's Live

Google Ads

- Three Search campaigns launched August 10 — **Electrical**, **HVAC**, and **Branded** — targeted to the service area, with full conversion tracking (phone clicks, Book Now form, contact form) connected and reporting.
- Combined daily spend is running at the approved media plan's August allocation.

Meta Ads

- Not yet live. The account build and creative are in progress for two campaigns — a brand awareness campaign and the "Beat the Heat" tune-up/replacement offer from the media plan — both on track to launch Monday, August 24, once creative is finalized this weekend.

2. How It's Performing

Google Ads, August 10–20 (first eleven days live):

Campaign	Impressions	Clicks	CTR	Avg. CPC	Spend	Conversions	Cost/Conv.
Electrical	5,835	242	4.1%	$3.22	$780.18	15	$52.01
HVAC	4,915	238	4.8%	$2.14	$510.19	21	$24.29
Branded	694	56	8.1%	$2.43	$135.93	5	$27.19
Total	**11,444**	**536**	**4.7%**	**$2.66**	**$1,426.30**	**41**	**$34.79**

- 41 conversions in the first eleven days — a mix of call-button activity from the ads and website contact-form submissions — backed up by the site's own analytics, which show 5 completed lead forms, 51 phone-number taps, and 56 interactions with the online booking widget over the same period.
- The Branded campaign is the strongest performer on cost efficiency (8.1% CTR, $2.43 average click), typical for a campaign built around the business's own name. Electrical and HVAC are each currently reaching a modest share of available local search volume in their categories — real headroom to capture more of that demand if increasing those budgets becomes a priority.

3. What's Outstanding

- **Meta launch (Monday, August 24):** final creative for the brand awareness campaign and the Beat the Heat offer is being finished this weekend, with both campaigns launching Monday. We'll continue watching Search delivery and cost per conversion daily in the meantime, and send a follow-up once Meta has a few days of live data to report on.
