Google Ads — Performance Optimization Summary

Weekly account management · search targeting & lead-quality refinement

> As part of our ongoing management of your Google Ads account, our paid team completed a search-quality review this week and sharpened your campaign targeting. The goal, as always: keep every advertising dollar concentrated on homeowners actively searching for **siding, windows, doors, and exterior work** across your Dallas-metro service area.

WHAT WE OPTIMIZED THIS WEEK

- **Sharpened search targeting.** Refined your active search campaign so your ads concentrate purely on home-exterior intent, tuning out loosely related automotive and auto-glass searches that don't match your services.
- **Focused the budget.** With tighter targeting in place, more of your spend now reaches high-intent homeowners looking for exterior improvements.
- **Protected genuine demand.** Legitimate home window-replacement searches — a strong performer for you — remain fully active and untouched.

SEARCH REFINEMENTS APPLIED TO YOUR LIVE CAMPAIGN

car · auto · automotive · windshield · windscreen · vehicle · truck · car window · auto glass · window tint

WHAT THIS MEANS FOR YOU

HIGHER LEAD RELEVANCE

More inquiries from homeowners who genuinely match your siding, window, and exterior services.

IMPROVED EFFICIENCY

Budget stays focused on qualified, high-intent exterior searches in your market.

NO DISRUPTION

Real window-replacement demand keeps converting exactly as before.

WHAT'S NEXT

- **Account-wide consistency.** We're rolling the targeting framework across all of your campaigns as a shared standard, so every current and future campaign stays aligned by default.
- **Continuous monitoring.** We'll keep reviewing live search activity and tightening match settings on your window and siding ad groups to push lead quality even higher.
