Mission Accomplished

Facebook and Instagram Ads Report
Lead generation: August 11 to September 9. Awareness: August 30 to September 28, 2026.
Prepared by TopServ Digital, September 29, 2026

This report covers your Facebook and Instagram ads in two parts. The first is the lead generation campaigns, over the 30 days leading up to September 9, when we paused them. The second is the awareness campaign that has kept running since, over the last 30 days through yesterday. Before the numbers, here's why the account is set up the way it is right now.

1. Why Lead Generation Is on Pause

In early September your team let us know the Facebook leads weren't coming through. When we looked into it together, the leads were arriving. Every form someone fills out on Facebook or Instagram goes straight into your GoHighLevel account with their name and phone number. The part that wasn't carrying over was the phone number in the email notification Hatch sends your team, so the alert showed up without a number to call back.

We didn't want to keep paying for new leads until that handoff between GoHighLevel and Hatch was sorted out, so on September 9 we paused the lead campaigns and shifted Facebook over to awareness. That keeps Mission Accomplished in front of people across Lake Havasu City, Bullhead City, Kingman, Parker and Needles every day, and it doesn't rely on the form at all.

2. Lead Generation Results, August 11 to September 9

The lead campaigns ran to people within 50 miles of Lake Havasu, using Meta's own lead form. They went through three rounds of ads: the early August set, a free second opinion offer in mid August, and a new set of offers that went live August 28, after a short break from August 20 to 27 while it was being put together. Over the 30 days the ads were shown 22,086 times and got 148 link clicks, a 0.67% click rate, and 5 leads came in through the form.

Results by Ad

Ad	Spend	Link Clicks	Leads	Cost per Lead
New System from $125/mo	$365.14	35	3	$121.71
Your Friendly Pros	$330.13	41	2	$165.07
Free Second Opinion, Save $2k	$221.02	25	0	
Think You're Overpaying?	$138.03	18	0	
Repair or Replace, $75 Tune Up	$119.36	11	0	
Mission Comfort Club, Free Thermostat	$103.81	17	0	
Is Your AC Failing?	$5.53	1	0	
Total	**$1,283.02**	**148**	**5**	**$256.60**

The $125 a month new system offer was the standout. It brought in 3 of the 5 leads, and the version with the photo of the tech and the van did best at about $90 per lead, roughly a third of the overall average. Your Friendly Pros brought in the other two. The rest of the offers got clicks but no form fills in this window.

When Each Lead Came In

Here are the dates, so your team can match them up in GoHighLevel.

Date	Ad
August 13	Your Friendly Pros
August 14	Your Friendly Pros
August 31	New System from $125/mo
September 6	New System from $125/mo
September 7	New System from $125/mo

Meta logs each lead on the day the person saw the ad, which is usually the same day they filled out the form.

3. Awareness Results, August 30 to September 28

The awareness campaign went live September 3, so the numbers below cover September 3 through September 28. It runs six short videos to adults 30 to 65 within about 25 miles of Lake Havasu City, Bullhead City, Kingman, Parker and Needles.

An awareness campaign has a different job than a lead campaign. It isn't built to get form fills. It's built to put your name in front of as many local people as possible, often enough that when the AC quits or the heat won't come on, Mission Accomplished is the name they already know.

Overall Results

Metric	Result
Spend	$476.86
Reach (accounts that saw your ads)	37,249
Impressions	92,789
Average times each account saw them	2.5
Cost per 1,000 impressions	$5.14
Estimated ad recall lift	1,710
Cost per estimated recall	$0.28
Video plays	87,079
ThruPlays	1,698
Link clicks	69

Estimated ad recall lift is Meta's estimate of how many people would remember seeing your ad if asked within two days. A ThruPlay is a video watched to the end or for at least 15 seconds.

With the lead campaigns on pause, we raised the awareness budget in two steps, from about $10 a day to $20 a day on September 15, then to $30 a day on September 21. Daily reach grew right along with it, from about 1,600 accounts a day in the first two weeks to about 4,400 a day over the last week. A little under 6 in 10 impressions ran on Instagram, about 4 in 10 on Facebook, and a small share on Threads.

For context, awareness runs at about $5 per 1,000 impressions, compared to about $58 on the lead campaigns, so each dollar reaches more than ten times as many screens. It won't bring in form fills on its own, but it gets your name in front of a lot more people for the same money.

Results by Video

Video	Spend	Reach	ThruPlays	Est. Recall Lift
Running But Not Cooling	$202.19	21,958	675	940
How Often to Service Your AC	$91.74	12,251	449	590
Testimonial: Roger	$91.72	11,737	256	550
20 Year Old AC: Fix or Replace	$56.62	8,208	241	400
Testimonial: Kelly	$19.67	3,100	33	160
Signs Your AC Needs Service	$14.92	2,674	44	130
Campaign Total	**$476.86**	**37,249**	**1,698**	**1,710**

The same person can see more than one video, so reach and recall by video add up to more than the campaign totals.

Running But Not Cooling has pulled the most views, so Meta has put the most budget behind it, about 42% of spend. How Often to Service Your AC has the best watch rate of the six, and Roger's testimonial is close behind it on reach.

4. What's Next

- **Test the Hatch notification.** Once a test lead goes from the Facebook form into GoHighLevel and lands in your Hatch email with the phone number showing, we'll turn lead generation back on.
- **Lead with the $125 a month offer.** When lead ads come back, the new system offer goes first, since it brought in the most leads at the lowest cost, with fresh versions of it running alongside.
- **Keep awareness on.** It'll keep running while lead ads are off and after they're back, so the people who've already seen your videos recognize the name when a lead ad shows up.
