AC / HVAC

01 Thursday

~42s · 105 words

"It's a hundred degrees out, your AC quit sometime last night, and the company you called can't get here till Thursday."

"We're out of Santa Fe and we cover the whole county. League City, Friendswood, Texas City, Galveston."

"Get hold of us during the day, you're usually talking to somebody inside the hour. Most days we're at your house that same afternoon."

"And if it's two in the morning and the house is already at ninety, somebody answers then too. That's what the twenty-four seven actually means."

"Your AC didn't wait for business hours. We don't either. Tap Learn More and talk to us right now."

02 Pointing fingers

~37s · 89 words

"Your AC keeps knocking out the breaker."

"So the AC company comes out, pokes around, tells you it's electrical, call an electrician. Electrician comes out, tells you it's the AC."

"Meanwhile you're a week in, sleeping downstairs where it's cooler."

"We hold three state licenses. AC, plumbing, electric. Same company, same truck."

"So when your AC and your panel are pointing fingers at each other, nobody's getting referred anywhere. We just find it and fix it."

"One company, all three trades. Tap Learn More and talk to us right now."

03 Standing in the shower

~41s · 98 words

"You found out your water heater died the way everybody finds out. Standing in the shower."

"Here's the thing, most of the time we can fix that today. Tank, tankless, doesn't matter, we work on both."

"We come out, we tell you what it is and what it costs before we touch anything. You say go or you don't."

"If it's beyond fixing, we'll put a new one in, and there's financing if you need it."

"Nobody should be heating water on the stove to give their kid a bath. Tap Learn More and talk to us right now."

04 The warm spot

~40s · 98 words

"Your water bill doubled for no reason."

"There's a warm spot on the floor by the hallway."

"And you can hear water running when nothing's on."

"That's a slab leak. What scares people is the picture in their head. Somebody with a jackhammer taking apart the living room floor to go looking for it."

"We find it first. Electronic detection, we listen through the slab and pinpoint it before anybody breaks anything."

"Then we open the smallest hole that gets the job done."

"Your floor is not a search area. Tap Learn More and talk to us right now."

05 The one that doesn't work

~38s · 92 words

"There's an outlet in your kitchen that stopped working a year ago, and you just stopped using it."

"Same with the breaker you reset every time somebody runs the microwave and the toaster together. You worked around it."

"Here's the thing, all of that is the same conversation, and it's usually a couple hours of work."

"We come out and we actually find what's causing it, instead of just swapping the outlet and hoping."

"You've been living around your own house long enough. Tap Learn More and talk to us right now."

06 The boring way

~36s · 87 words

"Somebody your neighbor knows did your panel on a Saturday. Cash, no paperwork, and it's been fine ever since."

"It's fine right up until you sell the house and the inspector opens that panel."

"Or you file a claim and the adjuster asks who pulled the permit."

"We do it the boring way. Two hundred amp panel, permit filed, inspection scheduled, and it's on record."

"It costs more than a Saturday. It costs a lot less than finding out later."

"Tap Learn More and talk to us right now."

07 Since 1976

~39s · 94 words

"After the next big storm, there's going to be somebody in your driveway with plates from three states away."

"He'll do your roof cash, and he'll be gone before the first shingle lifts."

"We've been in Santa Fe since 1976. Fifty years, same town, same address."

"We put on Owens Corning and GAF, rated to a hundred and thirty mile an hour wind, because we know what comes through here."

"When your roof needs looking at again in ten years, you'll know where to find us. Tap Learn More and talk to us right now."

08 Either way you stop wondering

~34s · 81 words

"You're pretty sure the roof took a hit in the last storm."

"You're also pretty sure you don't want to deal with your insurance company about it."

"So we come out and look. That part's free."

"If there's damage, we document all of it. Photos, measurements, the whole file, and we're there when your adjuster comes out."

"If there's nothing, we tell you there's nothing and we leave."

"Either way you stop wondering. Tap Learn More and talk to us right now."

09 Maybe

~39s · 94 words

"Your AC runs all day and the house never really gets cool, so somebody told you it's time for a bigger unit."

"Maybe. We sell those too."

"But your attic is a hundred and forty degrees up there right now, and if there's four inches of insulation between that and your ceiling, no AC is going to win that fight."

"We check the attic first. That part's free."

"Gulf Coast attics want R-38 and up. Go stick your head up there and look at yours. Tap Learn More and talk to us right now."

10 If you can see the wood

~34s · 81 words

"You stuck your head in the attic once, saw insulation up there, and figured you were covered."

"Easy test. If you can see the top of the wood beams, you don't have enough."

"That stuff went in as strips before you owned the house. It settles, it gaps, it flattens out."

"We blow in Owens Corning AttiCat. No seams, no gaps, buries everything, R-38 and better."

"Most houses, one day, and we're gone."

"Tap Learn More and talk to us right now."

11 Nobody looks up

~41s · 99 words

"You've got a generator in the garage. The kind you have to go outside and start. In the storm."

"Then it's extension cords through the window, and you're back out there every eight hours with a gas can, hoping the station down the road has power."

"A Generac sits outside on a pad, runs off the gas line you already have, and starts by itself in ten seconds. You don't do anything. You might sleep right through it."

"It tests itself every week so it works the night it matters."

"Tap Learn More and talk to us right now."

12 There's no list

~40s · 97 words

"The day after the storm is when everybody decides they want a generator."

"That's also the day the phone doesn't stop, the trucks are booked out, and there's a list."

"We're in hurricane season right now, and today there's no list."

"We come out, look at your house, tell you what size you need and what it costs. That part's free."

"Most installs we're done in a day. Permits, gas line, transfer switch, all of it."

"The generator you want in September is the one you buy now. Tap Learn More and talk to us right now."

13 Nothing sounds wrong

~42s · 100 words

"Your AC is working. It's making cold air right now."

"Some of that cold air is going into your attic through a duct that came apart up there, and you're paying for every bit of it."

"Ducts can lose twenty to thirty percent of what your system makes."

"You'd never know. Nothing sounds wrong, nothing looks wrong, the bill's just high."

"An audit is how you find out. We check the ducts, the leaks, all of it, and you get a written list of what's costing you and what it costs to fix."

"Tap Learn More and talk to us right now."

14 We don't sell windows

~34s · 81 words

"Somebody told you it's your windows. Somebody else says you need a bigger AC. Everybody's got an opinion, and most of them are selling it."

"We don't sell windows. So here's the honest version."

"Usually it's the cheap stuff first. Sealing up the leaks, fixing the ducts, then the attic."

"An audit is somebody actually measuring your house and handing you a list, in order, with what each one costs."

"Then you decide. Tap Learn More and talk to us right now."
