Proud Pops Plumbing, Air & Electric

Google Ads Performance Summary
Last 30 days: September 8 to October 7, 2026
Channels: Google Search, Performance Max, Local Services Ads, and YouTube
Prepared by TopServ Digital

This report covers the last 30 days and counts customer leads only. Form leads are customer requests from the website. Job applications from the careers page are now tracked on their own, so they aren't in these numbers. Phone activity is split two ways: calls Google can confirm, and taps on your phone number after someone clicks an ad.

1. 30 Days at a Glance

Metric	Value
Total Google investment	$60,391.84
Search and Performance Max	$53,574.14
Local Services Ads	$788.76
YouTube	$6,028.94
Customer form requests (Search and Performance Max)	47
Local Services leads (16 calls, 2 messages)	18
Total customer leads	**65**
Cost per customer lead (Search, Performance Max and Local Services)	$836.35
Confirmed phone calls (Local Services, 12 lasted over a minute)	16
Phone number taps after a Search ad click	186
Phone number taps from Performance Max	1,041

YouTube is brand awareness, so it's left out of cost per lead (section 5). Calls from people who found you through a Search or Performance Max ad aren't confirmed in Google Ads yet, so the real lead count is higher than 65 (section 3).

2. Google Search & Performance Max

Campaign	Investment	Clicks	Avg. CPC	Customer forms	Cost / form	Phone taps
Search, Electrical	$18,595.80	758	$24.53	17	$1,093.87	101
Search, HVAC	$11,152.96	306	$36.45	12	$929.41	38
Search, Plumbing	$5,011.86	134	$37.40	6	$835.31	28
Search, Branded	$2,116.92	203	$10.43	7	$302.42	19
Performance Max, HVAC	$9,807.95	8,558	$1.15	2	$4,903.98	344
Performance Max, Electrical	$6,888.65	16,139	$0.43	3	$2,296.22	697
Total	**$53,574.14**	**26,098**	**$2.05**	**47**	**$1,139.88**	**1,227**

Google Ads recorded 174 form submissions from these campaigns. About 127 of them were job applications from the careers page, so they're left out above. Customer forms are what's left once those are

taken out, matched against Google Analytics campaign by campaign.

Search brought in most of the customer requests. Branded search was the most efficient at about $302 per form. Performance Max reached far more people at a much lower cost per click, but most of its form activity came from job seekers. It's now kept away from the careers page and job searches, and we'll review it in late October.

Your Search ads showed for about 21% of the searches they were eligible for. Of the rest, 48% went to ad rank (how relevant and competitive the ads are) and 31% to budget. That's why most of this month's work went into the ads themselves and who they reach.

3. Phone Calls

Type	Count	What it tells us
Confirmed calls, Local Services	16	Google recorded the call. 12 lasted over a minute.
Confirmed calls, Search and PMax	Not tracked yet	Verified call button and call tracking coming (section 7).
Phone taps, Search	186	Tapped your number on the site after a Search ad click.
Phone taps, Performance Max	1,041	987 came from display and YouTube, a lighter signal.

A tap opens the phone's dialer. It tells us someone meant to call, but not whether the call went through or how long it lasted. That's why taps aren't counted as leads in this report.

4. Local Services Ads

Profile	Investment	Leads	Calls	Messages	Booked	Charged
Main profile	$134.67	4	3	1	2	2
Electrician	$294.73	7	6	1	0	5
HVAC	$275.84	6	6	0	3	3
Old roofing profile (paused Oct 8)	$83.52	1	1	0	0	1
Total	**$788.76**	**18**	**16**	**2**	**5**	**11**

That works out to $71.71 per charged lead. 9 of the 18 leads are still open in the Local Services dashboard. Marking each one booked or declined helps Google rank your profiles, and a wrong-fit lead you were charged for can be disputed for a credit.

5. YouTube

Campaign	Investment	Impressions	Views	Clicks
San Antonio	$3,015.25	370,492	242,944	23
New Braunfels	$3,013.69	208,269	149,943	175
Total	**$6,028.94**	**578,761**	**392,887**	**198**

These campaigns are for brand awareness, so we track reach and views rather than leads. Starting October 8, children's content and 34 kids' channels are excluded, so the ads run in front of adult homeowners.

6. What We Worked On

Most of this went live on October 7 and 8, so the effect will show up in the next report.

- **Lead tracking.** Job applications from the careers page are now their own event, so the lead count shows customers only. Performance Max no longer sends visitors to the careers page, and job searches like "jobs near me" are excluded across the account.
- **Electrical Search.** Ads now land on the electrical services page. Google's AI Max feature is off, so the ads match the searches and pages we choose, and 39 unrelated searches were excluded after a search term review.
- **Plumbing and HVAC Search.** Excluded competitor name searches on both. On Plumbing we also set a cost-per-click ceiling, added a general plumber ad group, and pointed the ads at the plumbing and water heater pages.
- **Branded Search.** Raised the daily budget from $70 to $100 by moving $30 from Performance Max HVAC, so total budget didn't change. Added "Pops Electric" searches and widened it to your full 47-city service area, New Braunfels included.
- **Location targeting.** HVAC and Plumbing now reach the 20-city San Antonio metro instead of the city alone, and ads only show to people who are actually in the area.
- **Performance Max.** Searches for "Proud Pops" now go to the Branded campaign.
- **Ads and links.** Wrote 14 new ads that match what's on your website (in Google review now) and added a "Book a Free Pop-In" link to the schedule page on all Search ads.
- **Calls.** Google now counts a call from an ad only when it lasts at least 60 seconds.

7. What's Next

- **Confirmed calls from Search and Performance Max.** We need two things from your team: which number is your main line, and access to CallRail (or a CallRail connection to Google Ads). Then we'll add a verified call button to the ads and send call results back to Google.
- **Bidding on real leads.** Once a few days of clean data are in, around October 12, we'll have Google optimize for customer forms and confirmed calls.
- **Local Services.** We're reviewing all three profiles (job types, service area, hours, verification) to grow lead volume. Two quick asks for your team: mark open leads booked or declined, and reply to messages through the Local Services app.
- **Late October review.** Around October 26 we'll have three weeks of clean data and will recommend how to split budget across Search, Performance Max, and Local Services.
