Proud Pops Plumbing, Air & Electric

Google Ads Performance Summary
August 2026
Channels: Google Search, Performance Max, Local Services Ads, and YouTube
Prepared by TopServ Digital

August was a build month. We put HVAC on its own dedicated landing page, pushed more budget behind HVAC and Electrical while cooling season is still in full swing, and brought two new YouTube campaigns online to get your video content in front of homeowners in San Antonio and New Braunfels. Here's how it broke down.

1. Month at a Glance

Metric	Value
Total Google Ads investment	$48,302.53
Impressions	1,059,468
Clicks	31,908
Leads (form submissions + billable Local Services leads)	169
Cost per lead	$256.22
Calls to your business line from Search & Performance Max ads	1,069

Cost per lead is calculated on form submissions and billable Local Services leads. Total investment and impressions also include $5,001 in YouTube brand-awareness spend, covered separately below since it isn't a lead-generation channel. Call volume is shown for context, since most Proud Pops customers reach out by phone rather than a form — we're continuing to sharpen how that phone activity gets counted as a confirmed lead.

2. Google Search & Performance Max

Campaign	Investment	Form leads	Cost / lead	Calls
Performance Max, HVAC	$8,216.27	44	$186.73	601
Performance Max, Electrical	$5,471.60	57	$95.99	301
Search, Electrical	$11,462.77	15	$764.18	92
Search, HVAC	$9,545.50	10	$954.55	29
Search, Plumbing	$3,964.89	3	$1,321.63	29
Search, Branded	$1,366.46	0	—	17
Total	**$40,027.49**	**129**	**$310.29**	**1,069**

Performance Max carried most of the volume this month at the strongest cost per lead in the account. Search campaigns lean more heavily on phone activity than forms, which is typical for plumbing, electrical, and HVAC search traffic — the call column reflects that.

3. Local Services Ads

Surface	Investment	Leads received	Billable leads	Cost / billed lead
Local Services (main account)	$1,458.97	18	16	$91.19
Local Services, Electrician	$585.53	16	11	$53.23
Local Services, HVAC	$1,229.37	17	13	$94.57
Total	**$3,273.87**	**51**	**40**	**$81.85**

4. YouTube

Campaign	Investment	Impressions	Clicks
San Antonio	$2,500.24	358,289	22
New Braunfels	$2,500.93	122,140	90
Total	**$5,001.17**	**480,429**	**112**

These campaigns are brand-awareness, not lead generation, so we're tracking reach rather than cost per lead. Both are still early in delivery — more to share as they ramp through September.

5. What We Worked On

- Built a dedicated landing page for HVAC search traffic and pointed the AC repair, installation, and maintenance ads there instead of the general homepage, so that traffic lands somewhere built specifically for the offer.
- Increased investment behind the HVAC campaigns, Search and Performance Max both, heading into peak cooling season, and set performance targets to guide Google's bidding toward efficient volume.
- Sharpened HVAC targeting with additional keyword refinements to keep spend focused on the right searches.
- Increased investment behind the Branded and Electrical Search campaigns after finding both were positioned to capture meaningfully more visibility for the added budget.
- Refined the ad messaging inside the HVAC Performance Max campaign, tightening a handful of assets that were carrying mixed messaging so the campaign speaks more directly to HVAC customers.
- Tuned network settings on the Plumbing Search campaign to keep delivery focused on Google Search.
- Launched two new YouTube brand-awareness campaigns, bringing Proud Pops' video content to homeowners in San Antonio and New Braunfels.
- Streamlined how leads are counted in the account, removing a secondary click-based signal from the tally so lead reporting reflects genuine customer contacts more precisely going forward.

6. What's Next

- **Extend the dedicated landing page approach** used for HVAC to the Electrical and Plumbing campaigns.
- **Keep building out call tracking** so phone activity can be counted alongside form leads with full confidence.
- **Carry the HVAC investment** through the rest of the cooling season.
- **Watch the new YouTube campaigns** as they clear their initial delivery ramp.
