Proud Pops — HVAC Keyword & Search Term Report

Account: 1051843378 (PPC, ex-The Problem Solvers) · **Campaign:** TSD_05.14_Leads_Search_Nonbranded_HVAC (23848895678) **Date range:** 2026-05-14 to 2026-09-13 (full lifetime of the current campaign structure) **Pulled:** 2026-09-14 · **Scope:** Non-branded HVAC keyword research only — every Proud Pops / The Problem Solvers / My Favorite Service Company brand mention has been stripped out of both tables below.

This account also runs a companion Performance Max campaign for HVAC — TSD_05.14_Leads_Pmax_HVAC (23853595615) — targeting the same demand. Performance Max has no manual keyword targeting and doesn't expose search-term-level data through the API, so it isn't part of this report — everything below comes from the Search campaign, which is the only place explicit keyword targeting exists in this account.

2. Top Converting Search Terms (actual queries)

Out of **1,163** distinct non-branded search terms that triggered an ad (**230 clicks, $7,707.90 spent, 44.1 conversions** over the period), these are the top 40 by conversions.

"Matched Keyword" is the keyword in the account that the term actually triggered off of — a wide gap between the search term and the matched keyword text is a signal the term deserves its own exact-match keyword rather than riding on a broader match.
