2. Top Converting Search Terms (actual queries)

Out of **444** distinct non-branded search terms that triggered an ad (**450 clicks, $4,972.13 spent, 34.0 conversions** over the period), these are the top 40 by conversions. "Matched Keyword" is the keyword in the account that the term actually triggered off of — a wide gap between the search term and the matched keyword text is a signal the term deserves its own exact-match keyword rather than riding on a broader match.
