WATT'S RIGHT ELECTRIC

PPC Spend Review & Increase Recommendation

Tulsa, OK · callwattsright.com

Period: Trailing 30 days (August 10 to September 8, 2026)
Channels: Google Search & Performance Max (PPC only, Local Services Ads excluded)
Prepared by: TopServ Digital

Current Monthly Spend & Where It Goes (PPC Only)

Over the trailing 30 days, PPC (Search and Performance Max, Local Services Ads excluded) spent **$2,550** and produced **76 verified leads** (form fills and tracked calls only, call-button clicks not counted) at a blended **$34 per lead**. Current daily budgets imply about $3,496 a month once fully ramped; EV Charger only began delivering in the final week of this window.

Channel	Monthly Spend	% of Spend	Leads	Cost / Lead
Performance Max	$647	25%	31	$21
Non-branded Search	$1,177	46%	12	$98
Branded Search	$428	17%	19	$23
EV Charger Search	$298	12%	14	$21
Total	**$2,550**	**100%**	**76**	**$34**

Performance Max and EV Charger are the cheapest channels at about $21 a lead. Non-branded Search runs highest at $98 a lead, roughly four to five times the other campaigns, while carrying almost half of PPC spend.

Recommendation: +37% on Search & Performance Max

We pulled impression share on each paid campaign to separate a **budget** problem (fixable with more money) from a **competitive/rank** problem (isn't). Performance Max and EV Charger are losing most of their missed reach to budget alone. EV Charger is 80% budget-capped, with almost zero rank loss. Non-branded's missed reach splits evenly between budget and rank, so more money there only recovers half the ceiling; Branded isn't budget-constrained at all. New spend goes where it buys the most at today's cost per lead:

Campaign	Current Daily	Proposed Daily	Change
Performance Max	$30	$45	+50%
EV Charger Search	$35	$55	+57%
Non-branded Search	$30	$37	+23%
Branded Search	$20	$20	No change
Total	**$115**	**$157**	**+37%**

That's **$3,496 a month to $4,773 a month** across these four PPC campaigns (about $1,277 more a month). This covers PPC only; Local Services Ads sits outside this budget. EV Charger's numbers are strong but only a week old, so we'd check back in at two and four weeks before pushing further.
